A barbecue supper in the camp shelter at the Coleman town park and a short but interesting talk by Dave B. Young, general manager of the Coleman Collieries, wound up the Coleman Board of Trade meetings until the fall.

Mr. Young gave an interesting talk on his recent trip to Geneva where he attended a World Meeting on mining which was attended by 120 delegates from 22 countries of the free world. Mr. Young outlined the gist of the conference, pointing out that it embraced a coverage of wages, rates paid and living conditions.

He also spoke of his visit to Paris, where he spent several days sight-seeing as well as in London, where he visited the House of Lords, the House of Commons, Westminster Abbey and Buckingham Palace.

While in England, Mr. and Mrs. Young visited a brother of James Allen, sr., of Coleman, living at Harrow on Hill.

Mr. Young also commented on the failing mining conditions in England, stating that railways there were converting to diesel and that power plants were being run on diesel and gas and that there were a number of electric railways. He added that coal mined there sold at \$36.00 a ton in London.

Mr. Young then gave a resume' of his visit to his homeland in Scotland where he visited with relatives.

During the business session President John Sals announced that he would be attending a Board of Trade meeting to be held in Lethbridge on August 23rd, which would be attended by John Diefenbaker.

Prior to the meeting the members of the Board retired to the site of the flag pole that was installed in the town park last week by the Board of Trade. A ceremony was held at this point by the Coleman Lions Boy Scout Troop under the leadership of Mel Dunford and the Club Pack led by J. Lonsbury.

The Dunfords have just heard from the doctors at Mayo Clinic, who have now advised regretfully that they will not be able to operate on Spencer Dunford this year.

Apparently they have been unable to obtain sufficient blood donors of the right grouping for the date of the operation. The operation therefore will not now take place until July, 1960.

The Lions Club take this opportunity to sympathize with the Dunfords and will take full advantage of the year ahead to continue to raise funds for this worthy cause.

Any donations will therefore continue to be gratefully accepted at The Canadian Bank of Commerce in Coleman.

Buy Alberta Made Goods

Proofs of the stylized replica of the Alberta floral emblem, the wild rose, are being mailed to hundreds of Alberta industrial firms.

Alberta firms are being encouraged to mark their products with the emblem as part of the promotional "Buy Alberta Made" program con-

ducted by the provincial government.

The simplified wild rose emblem is expected to be seen on labels and tags on scores of Alberta-made commodities, and stamped or burned into the surfaces of many other products that do not lend themselves to labelling or tagging.

The program is designed to acquaint Albertans with the extent and variety of Alberta industry to stimulate their recognition and sales on a strictly competitive basis.

The "Buy Alberta" program is organized and operated by the Industrial Development Branch of the Department of Economic Affairs, and by the Department of Industries and Labor. Committee members drawn from industry and social and economic organizations throughout Alberta will be active in the promotion of the campaign.

POWER

FROM ALBERTA'S "UNKNOWN COUNTRY"!

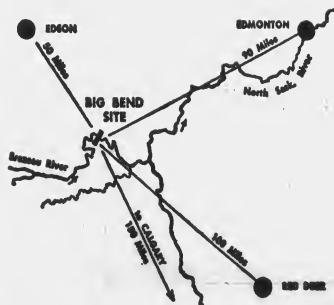

New multi-million dollar Brazeau River Project . . . another forward step in Calgary Power's long-range planning to maintain LOW-COST POWER

CALGARY POWER LTD. has a multi-million dollar belief in Alberta's progress! While serving the province today, the company plans and builds ahead to maintain efficient, low-cost service tomorrow.

Latest news of Calgary Power's long-range expansion program comes from one of the most isolated regions of Alberta — the lower reaches of the Brazeau River. In this virtually unknown area of dense forest and muskeg, work is under way on a new power project that will benefit, in particular, residential consumers.

When completed in 1964 this important hydro project will complement the 144,000-KW base-load thermal plant at Wabamun. The new powerhouse and dam (towering two hundred and thirty feet above the bedrock of the river) are designed for economical peak-load power. From the "big bend" of the Brazeau will flow low-cost, dependable power for the "busy periods" when it's needed most!

Watch for further reports on the Brazeau Development — one more example of constant forward-planning at Calgary Power Ltd.
